

SAFETY KNIFE CUTX BASIC X6060 MULTICUT MAX

All-purpose cutter for large hands, with adjustable blade outlet

The big brother of our MultiCut CUTX BASIC X5044 with improved handling and adjustable blade outlet. The special novelty is the upper slider in the freewheel, which should be used primarily for vertical cuts. The MultiCut MAX CUTX BASIC X6060 is suitable for cuts into all conventional packaging and is an all-rounder for branch offices, warehouses, offices and handicrafts. Due to its low weight it is also easy on your wrist when used frequently and lies well in your hand due to its gently rounded shape. A cord can be pulled through the screw at the end of the handle. The blade can be operated either from above or sideways. Automatic blade withdrawal. Sustainable thanks to double-usage and interchangeable blade. Multiple blade types can be applied. For right- and left-handed users.

EAN-Code Art. 3010089:	4251946400249
Customs tariff number:	82119300

Automatic blade retraction

Safety knives with automatic blade retraction already offer you good protection against injury. Please note that the user must actively release the slider after starting the cut so that the blade automatically slides back into the housing after the cutting process.

variable handling and variable blade outlet

Compared to our MultiCut CUTX BASIC X5044 the „MAX X6060“ has not only grown: the blade can be operated from the side as well as from above. When operating with the upper slide, you can exert significantly more pressure on the material with vertical cuts. You can also vary between two cutting depths. As with the small MultiCut CUTX BASIC X5044, the handle is comfortably light in the hand and the blade is suitable for all common packaging.

Well kept

Would you like to have your MultiCut MAX CUTX BASIC X6060 at hand in a fixed location? A cord (max. 3 mm diameter) can be pulled through the screw at the end of the handle. This allows you to hang the MultiCut in a meaningful place. Of course, it also fits in your pocket if you want to have it with you.

Sustainable

We want to do our bit: CUTX safety knives are made in Solingen / Germany from up to 80% recyclable plastic. We use sustainable energy for production and assembly, including from our own solar power system.

Our extensive experience in knife production also guarantees consistently high quality and durability.

You can also do your bit: we take back old cutting tools and recycle them properly. Please contact us: mail@cutx.info

Printing and special colours possible

Our items are also available in your favorite colours. In addition, they can be printed, so that you have here an excellent and individual advertising medium, which your customers will certainly take at hand again and again.

Application Areas

CUTX safety knives assist you in your day-to-day work and protect the goods in the packaging with their short blade.

Cutting of:
Cardboard, paper, adhesive tape, strapping tape, foil
For right- and left-handed people.

foil

Cardboard

strapping tape

Technical information

Safety knife
CUTX BASIC X6060

Easy blade change, blade outlet adjustable

Your two hands are sufficient as an aid. Simply level the screw at the end of the handle, slide the blade holder all the way forward, open the cover and turn over, replace or move the blade in the position. Finished.

Spare parts / blades

The replacement blades are supplied in dispensers of 10 each.
H10002 Trapezoid blade
H10005 Trapezoid blade rounded
Hooked blade on request

Safe handling

Push out the blade, put it on, release sliders. The automatic blade retraction ensures that the blade automatically slides back into the housing as soon as the cutting material is left.

Safety instructions

Please read the instructions carefully and keep them to ensure prolonged and safe use of our cutting tools.

This product is only approved for manual cutting and must not be used for purposes other than those for which it is intended. Care must be taken to ensure correct handling and use.

Avoid injury: Only use cutting tools that are in good condition and have sharp, undamaged blades. Exercise caution when handling this product. Be sure to familiarise yourself with its handling and operation beforehand. The sharp blade can cause serious cuts. Do not hold the blade, do not place your other hand along the cutting path of the cutter and always cut past your body. Replace blunt blades quickly and dispose of them properly.

Tighten the cutter to avoid injury. Store the cutter in a safe place.

Keep the cutter clean and do not expose it unnecessarily to dust, dirt and moisture to ensure longevity.

No liability is accepted for consequential damage.
Subject to technical changes and errors!
This product should not be used by children!
