

SAFETY KNIFE CUTX MAXI X7070 VARIOCUT

Extremely safe, extremely sharp, extremely variable

The CUTX maxi X7070 is our best, most variable and most sustainable CUTX safety knife and is the perfect companion for warehouse workers!

Leadership qualities

Why does the CUTX maxi X7070 have such outstanding cutting properties and can even handle two-layer cartons with ease? Because we have added guide surfaces on the way to the blade that help you to cut at an angle and glide through the material to be cut even more easily.

extremely economical and sustainable

The robust handle is the heart of the CUTX MAXI X7070 VarioCut, which can accompany you for years. The glass fibre reinforced blade head can be replaced easily and without tools. Since the blade can also be used on both sides of the blade head, the VCUTX MAXI X7070 VarioCut is an extremely durable safety knife at low cost. Depending on your preferences and requirements, the blade head is available with different blade types

Injuries and damages excluded

No matter whether you pull the knife out of your pocket, cut open a package or slip off by accident: the protective hook is always in front of the blade and thus prevents injuries to your employees and damage to your goods. Unnecessary costs for loss of work, clean-up work, replacement purchases and administrative work are avoided.

Extremely economical

The robust handle is the centrepiece of the CUTX MAXI X7070 VarioCut, which can accompany you for a long time. The glass fibre-reinforced blade head can be replaced easily and without tools. As the blade can also be used on both sides of the blade head, the CUTX MAXI X7070 VarioCut is an extremely durable CUTX safety knife with low costs.

Sustainable

We want to do our bit: CUTX safety knives are made in Solingen / Germany from up to 80% recyclable plastic. We use sustainable energy for production and assembly, including from our own solar power system.

Our extensive experience in knife production also guarantees consistently high quality and durability.

You can also do your bit: we take back old cutting tools and recycle them properly. Please contact us: mail@cutx.info

Printing and special colours possible

Our items are also available in your favorite colours. In addition, they can be printed, so that you have here an excellent and individual advertising medium, which your customers will certainly take at hand again and again.

1

2 A

Attach blade / insert hook

2 B

Angle the knife sideways for cardboard packaging

3

Carry out the cut quickly

Safety instructions

Please read the instructions carefully and keep them to ensure prolonged and safe use of our cutting tools.

This product is only approved for manual cutting and must not be used for purposes other than those for which it is intended. Care must be taken to ensure correct handling and use.

Avoid injury: Only use cutting tools that are in good condition and have sharp, undamaged blades. Exercise caution when handling this product. Be sure to familiarise yourself with its handling and operation beforehand. The sharp blade can cause serious cuts. Do not hold the blade, do not place your other hand along the cutting path of the cutter and always cut past your body. Replace blunt blades quickly and dispose of them properly.

Tighten the cutter to avoid injury. Store the cutter in a safe place.

Keep the cutter clean and do not expose it unnecessarily to dust, dirt and moisture to ensure longevity.

**No liability is accepted for consequential damage.
Subject to technical changes and errors!
This product should not be used by children!**
