

CUTX MAXICUT X6060 WITH ADJUSTABLE BLADE

Thanks to their low weight, the two CUTX MAXICUT Safety Knives are easy on the wrists, even with frequent use. Their gently rounded ergonomic shapes fit large and small hands equally well. With the CUTX Top Slider, the CUTX MAXICUT can be operated from three sides and effective force can be applied to tough materials.

CUTX MAXICUT X6060 for longer, fatigue-free work

The CUTX MAXICUT X6060 cuts effortlessly through all standard packaging materials and is very durable thanks to its replaceable, double-use blade. Depending on the requirements of the material to be cut, different blade types can be used and two different cutting depths are possible with the adjustable blade.

Highlights

- automatic blade retraction
- with integrated CUTX Top Slider
- for medium cutting requirements
- dual purpose blade
- also available with extra long blade as **CUTX MAXICUT 40 X6040**

Sustainable

At CUTX, we are proud to do our part. All safety knives in our standard gray range are made from 95% recycled plastic. By using renewable energies and short transport routes to our local partners, we guarantee the conservation of valuable resources.

Our CUTX Safety Knives are designed to be optimally prepared for the recycling process. We have deliberately minimized the variety of raw materials used and have eliminated two-component plastics that prove difficult to separate. This allows for an easy separation of materials that can be reused in the production of new plastics.

You too can be part of this sustainable initiative. Send us your used CUTX Safety Knives and we will recycle them properly.

Printing and special colours possible

Our items are also available in your favorite colours. In addition, they can be printed, so that you have here an excellent and individual advertising medium, which your customers will certainly take at hand again and again.

Security certificate

Technical information

Safety knife CUTX MAXICUT X6060

Easy blade change, blade outlet adjustable

Take care when changing blades. Risk of injury!

Your two hands are sufficient as an aid. Simply level the screw at the end of the handle, slide the blade holder all the way forward, open the cover and turn over, replace or move the blade in the position. Finished.

Replacement blades

The spare blades are supplied in dispensers of 10 each.

H10002, trapezoidal blade (can be used on 2 sides, replaceable)

H10005, rounded trapezoid blade (can be used on 2 sides, replaceable)

Hook blade on request

Open the locking screw by turning to the left

Blade holder slide out

Open blade cover, blade can be used in 2 ways by turning, the cutting depth can be adjusted by changing the blade position

Changing the blade
Blade type: H10002 or comparable blades with the same dimensions

Close the blade cover, slide in the blade holder and close the locking screw by turning it to the right

see also safety instructions

Safe handling

Push out the blade, put it on, release sliders. The automatic blade retraction ensures that the blade automatically slides back into the housing as soon as the cutting material is left.

Slide the blade on the side or top slide forward

Fit the blade and release the blade holder

At the end of the cut, the blade holder springs back into the end position

Safety instructions

Please read the instructions carefully and keep them in a safe place so that you can use our cutting tools safely for a long time.

The product is only authorised for manual cutting work and must not be used for purposes other than those for which it is intended. Care must be taken to ensure correct handling and use.

Avoidance of injuries: Please only use cutting tools that are in perfect condition and have a sharp and undamaged blade. You should exercise caution when handling the product. It is therefore essential that you familiarise yourself with its operation and function beforehand. The sharp blade can cause serious cuts. Therefore, never reach into the blade, do not place your second hand in the cutting path of the blade and always cut past the body. Replace blunt blades in good time and dispose of them properly.

Secure the blade to avoid injury and store the blade in a safe place.

Keep the CUTX safety knife clean and do not expose it unnecessarily to dust, dirt and moisture to ensure a long service life.

No liability is accepted for consequential damage.

Subject to technical changes and errors!

This product should not be used by children!
